# Casual wear!

(For some reason in the original, she loses her dress at the very beginning of the game, and has to explore in her underwear. I removed this because the character is a minor, and I felt it was unnecessary! 💕)

WHICH IS YOUR FAVOURITE REDESIGN?

I used Ancient Greek inspiration for her costume iterations, as her name was Athena!

# Armour!

I felt that the armour was very cute, but impractical, so I drew some designs to better suit her game-world! In the game, she unlocks armour as she progresses, so I wanted it to look elegant and rewarding for the player to unlock!

# Hey guys!

I'm still working on my female character redesign project for a uni assignment, and I have another vote for you if you'd be willing!

A

B

From this page, I chose B, as it felt realistic, but also had a clearer silhouette and simpler design! The vote will be on colours this time!

### If you don't know what's going on...

I'm redesigning female video game characters for an assignment! I'm choosing one from each key time period of gaming, and trying to make them less objectified!

Please consider the fact that this character 'breathes through her skin', and although that is frustrating and obviously for fan-service, I have to respect the lore!

FYI 'C' has her wearing a tights-like mesh over her top half, to keep the breathability! And both 'B' and 'C' have a SWAT vest for protection.

(And, if she breathes through her skin, I find it ridiculous that she wears gloves?? Like, she can't wear a slightly bigger bra, but she can cover her entire hands??
